

DIARY NOTES

DD/S

31 July 1959

1. At the Deputies' Meeting:

a. The Director disapproved DD/P's recommendation that we ship a "three-man pack" [REDACTED] at a cost of [REDACTED] and directed that this shipment go by sea. (I instructed Jim Garrison accordingly.)

b. Dick Bissell gave a brief report on his meeting with the Latin American Station Chiefs [REDACTED] This was of particular interest to me because of his apparent high regard for the job being done by [REDACTED]

2. I talked with Larry Houston again about the Regulations and he has finally agreed that he would not nonconcur in the paraphrased Regulations. However, he does wish to go on record as saying that he is not in favor of this system and hoped that it could some day be reopened.

3. [REDACTED] called to say that in their study of the Office of Logistics she felt that they might be able to save as much as [REDACTED] over a period of five years by combining the [REDACTED] I told her that I would like to consider this possibility and that she should go ahead and study the matter.

4. Jim Garrison reported that they had worked out the space requirements for the new Computer.

\*\*\*\*\*

5. Matt Baird telephoned to say that he was sending me two reports commenting on the Inspector General's Survey of the Assessment and Evaluation Staff. One report [REDACTED] which Matt does not wish to be associated with, and the other is the official Office of Training report.

6. [REDACTED] was over to talk to me about [REDACTED] desire to transfer to the Administration Career Service. I told Von that except on a highly selected basis I could not continue to take DD/I people into the Administration Career Service unless DD/I wished to join forces with us and make their administrative positions available at the same time.
